Plant Science, 60 (1989) 279–282
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX

Volume 60 (1989)

Abelmoschus esculentus, Okra, tissue culture, callus, organogenesis, plant regeneration, silver nitrate, 77
N-Acetyl-β-D-hexosaminidase, chitin oligosaccharides, lignification, wheat, 163
Agrobacterium tumefaciens, plant transformation, callus cultures, kanamycin resistance, *firefly luciferase*, 223
Alfalfa, chromosome variation, somatic embryogenesis, aneuploidy, polyploidy, 91
Amaranthus spinosus, weed pathogens, mycoherbicides, toxin regulation, *Drechslera indica*, *Portulaca oleraceae*, 123
Ammonia metabolism, photosystem II, herbicides, nitrogen assimilation, 61
Aneuploidy, alfalfa, chromosome variation, somatic embryogenesis, polyploidy, 91
Anthocyanin, carrot suspension cultures, cyanidin, sinapic acid, 259
Antibodies, soybean cells, GDH, structure, synthesis, 173
Asymbiotic plant mutants, *Pisum sativum* L., *Vicia faba* L., endomycorrhiza, *Rhizobium leguminosarum*, chemical mutagenesis, 215
ATPase, detergent solubilization, reconstitution, plasma membrane, 189
Axial control, *Lapinus luteus*, cotyledon expansion, chlorophyll, cytokinin, seed germination, 181

Benzyladenine, *Phaseolus vulgaris*, dry bean, regeneration, cotyledonary node, 117
Brassica napus, rapeseed, oil-body, polypeptide (19 kDa), seed development, immunogold localisation, 47

C_3, C_3-C_4, C_4 and CAM plants, immunochemical reactivity, phosphoglycolate phosphatase, photorespiration, dicots, monocots, 9
C_3-C_4 intermediate, *Neurachne*, photosynthesis, photorespiration, $^{14}CO_2$, 155
Caffeoyl-CoA 3-*O*-methyltransferase, feruloyl-CoA, *Pmg* elicitor, *Daucus carota* L., 21
Calcium, cyanobacteria, nitrate, nitrogen fixation, respiration, *Synechococcus*, 195
Calcium-regulated protein kinase, histone phosphorylation, phosphatase, host-pathogen interaction, *Glycine max*, *Phytophthora megasperma*, 67
Callus, Okra, *Abelmoschus esculentus*, tissue culture, organogenesis, plant regeneration, silver nitrate, 77
Callus cultures, *Agrobacterium tumefaciens*, plant transformation, kanamycin resistance, firefly luciferase, 223
Callus formation, protoplast, plant regeneration, *Duboisia myoporoides*, cell suspension, 245
Carrot suspension cultures, anthocyanin, cyanidin, sinapic acid, 259
Catharanthus roseus, mycoplasma-like organism, tissue culture, plant regeneration, 83
–, serpentine synthesis, cytochrome *P*-450 inducer/inhibitor, 231
Cell division, protoplast culture, ultrafiltration, *Medicago sativa*, *Nicotiana tabacum*, protoplast physiology, 237
Cell suspension, protoplast, callus formation, plant regeneration, *Duboisia myoporoides*, 245
Cell wall protein, immunoelectron microscopy, shoot development, intercellular connections, *Pisum sativum*, 137
Chemical mutagenesis, *Pisum sativum* L., *Rhizobium leguminosarum*, mutants, nodulation, symbiotic nitrogen fixation, 207
–, –, *Vicia faba* L., endomycorrhiza, *Rhizobium leguminosarum*, asymbiotic plant mutants, 215
Chinese yam, *Dioscorea opposita*, suspension culture, embryogenesis, regeneration, 263
Chitin oligosaccharides, *N*-acetyl-β-D-hexosaminidase, lignification, wheat, 163
Chlorophyll, *Lapinus luteus*, axial control, cotyledon expansion, cytokinin, seed germination, 181
Chloroplast movement, microtobule inhibitors, colchicine, taxol, 1
Chromosome variation, alfalfa, somatic embryogenesis, aneuploidy, polyploidy, 91
$^{14}CO_2$, C_3-C_4, intermediate, *Neurachne*, photosynthesis, photorespiration, 155
Colchicine, microtobule inhibitors, taxol, chloroplast movement, 1
Cotyledonary node, *Phaseolus vulgaris*, dry bean, regeneration, benzyladenine, 117
Cotyledon expansion, *Lapinus luteus*, axial control, chlorophyll, cytokinin, seed germination, 181
Cryopreservation, embryo, freeze-hardening, water stress, *Zea mays*, 129
Cyanidin, anthocyanin, carrot suspension cultures, sinapic acid, 259
Cyanobacteria, calcium, nitrate, nitrogen fixation, respiration, *Synechococcus*, 195
–, photosystem II, DCMU, quinone-binding protein, photosynthetic electron transport, 149
Cytochrome *P*-450 inducer/inhibitor, serpentine synthesis, *Catharanthus roseus*, 231

Cytokinin, *Lapinus luteus*, axial control, cotyledon expansion, chlorophyll, seed germination, 181

Daucus carota L., caffeoyl-CoA 3-*O*-methyltransferase, feruloyl-CoA, *Pmg* elicitor, 21
DCMU, photosystem II, cyanobacteria, quinone-binding protein, photosynthetic electron transport, 149
Detergent solubilization, ATPase, reconstitution, plasma membrane, 189
Dicots, immunochemical reactivity, phosphoglycolate phosphatase, photorespiration, C_3, C_3-C_4, C_4 and CAM plants, monocots, 9
Dioscorea opposita, Chinese yam, suspension culture, embryogenesis, regeneration, 263
Drechslera indica, weed pathogens, mycoherbicides, toxin regulation, *Portulaca oleraceae*, *Amaranthus spinosus*, 123
Dry bean, *Phaseolus vulgaris*, regeneration, cotyledonary node, benzyladenine, 117
Duboisia myoporoides, protoplast, callus formation, plant regeneration, cell suspension, 245

Embryo, cryopreservation, freeze-hardening, water stress, *Zea mays*, 129
Embryogenesis, Chinese yam, *Dioscorea opposita*, suspension culture, regeneration, 263
Encapsulation, shoot bud explants, *Valeriana wallichii*, 111
Endomycorrhiza, *Pisum sativum* L., *Vicia faba* L., *Rhizobium leguminosarum*, chemical mutagenesis, asymbiotic plant mutants, 215
Enzyme purification, poly(A) polymerase, subunit structure, kinetic properties, product characterization, hypocotyl tissue, mung bean, 27

Fatty acids, *Papaver somniferum* L., seed development, lipids, triacylglycerols, 55
Fatty acid distribution, organelle isolation, phosphatidylglycerol, membrane phospholipids, fatty acid pairing, 39
Fatty acid pairing, organelle isolation, phosphatidylglycerol, membrane phospholipids, fatty acid distribution, 39
Feruloyl-CoA, caffeoyl-CoA 3-*O*-methyltransferase, *Pmg* elicitor, *Daucus carota* L., 21
Firefly luciferase, *Agrobacterium tumefaciens*, plant transformation, callus cultures, kanamycin resistance, 223
Freeze-hardening, cryopreservation, embryo, water stress, *Zea mays*, 129

GDH, soybean cells, structure, antibodies, synthesis, 173
Genetic instability, potato protoplast-derived plants, somatic hybridization, phenotypic variability, soma-ju clonal variation, 101
Gerbera, pollen, sperm, 273
Glycine max, calcium-regulated protein kinase, histone phosphorylation, phosphatase, host-pathogen interaction, *Phytophthora megasperma*, 67

Herbicides, ammonia metabolism, photosystem II, nitrogen assimilation, 61
Histone phosphorylation, calcium-regulated protein kinase, phosphatase, host-pathogen interaction, *Glycine max*, *Phytophthora megasperma*, 67
Host-pathogen interaction, calcium-regulated protein kinase, histone phosphorylation, phosphatase, *Glycine max*, *Phytophthora megasperma*, 67
Hypocotyl tissue, poly(A) polymerase, enzyme purification, subunit structure, kinetic properties, product characterization, mung bean, 27

Immunochemical reactivity, phosphoglycolate phosphatase, photorespiration, C_3, C_3-C_4, C_4 and CAM plants, dicots, monocots, 9
Immunoelectron microscopy, cell wall protein, shoot development, intercellular connections, *Pisum sativum*, 137
Immunogold localisation, *Brassica napus*, rapeseed, oil-body, polypeptide (19 kDa), seed development, 47
Intercellular connections, cell wall protein, immunoelectron microscopy, shoot development, *Pisum sativum*, 137
Intermediate, C_3-C_4, *Neurachne*, photosynthesis, photorespiration, $^{14}CO_2$, 155

Kanamycin resistance, *Agrobacterium tumefaciens*, plant transformation, callus cultures, firefly luciferase, 223
Kinetic properties, poly(A) polymerase, enzyme purification, subunit structure, product characterization, hypocotyl tissue, mung bean, 27

Lapinus luteus, axial control, cotyledon expansion, chlorophyll, cytokinin, seed germination, 181
Lignification, *N*-acetyl-β-D-hexosaminidase, chitin oligosaccharides, wheat, 163
Lipids, *Papaver somniferum* L., seed development, triacylglycerols, fatty acids, 55
Lycopersicon esculentum, suspension culture, rDNA cloning, physical mapping, rDNA heterogeneity, 199

Medicago sativa, protoplast culture, ultrafiltration, cell division, *Nicotiana tabacum*, protoplast physiology, 237
Membrane phospholipids, organelle isolation, phosphatidylglycerol, fatty acid distribution, fatty acid pairing, 39
Microtobule inhibitors, colchicine, taxol, chloroplast movement, 1
Monocots, immunochemical reactivity, phosphoglycolate phosphatase, photorespiration, C_3, C_3-C_4, C_4 and CAM plants, dicots, 9
Mung bean, poly(A) polymerase, enzyme purification, subunit structure, kinetic properties, product characterization, hypocotyl tissue, 27
Mutants, *Pisum sativum* L, *Rhizobium leguminosarum*, chemical mutagenesis, nodulation, symbiotic nitrogen fixation, 207

Mycoherbicides, weed pathogens, toxin regulation, *Drechslera indica*, *Portulaca oleraceae*, *Amaranthus spinosus*, 123
Mycoplasma-like organism, *Catharanthus roseus*, tissue culture, plant regeneration, 83

Neurachne, C_3-C_4, intermediate, photosynthesis, photorespiration, $^{14}CO_2$, 155
Nicotiana tabacum, protoplast culture, ultrafiltration, cell division, *Medicago sativa*, protoplast physiology, 237
Nitrate, calcium, cyanobacteria, nitrogen fixation, respiration, *Synechococcus*, 195
Nitrogen assimilation, ammonia metabolism, photosystem II, herbicides, 61
Nitrogen fixation, calcium, cyanobacteria, nitrate, respiration, *Synechococcus*, 195
Nodulation, *Pisum sativum* L, *Rhizobium leguminosarum*, chemical mutagenesis, mutants, symbiotic nitrogen fixation, 207

Oil-body, *Brassica napus*, rapeseed, polypeptide (19 kDa), seed development, immunogold localisation, 47
Okra, *Abelmoschus esculentus*, tissue culture, callus, organogenesis, plant regeneration, silver nitrate, 77
Organelle isolation, phosphatidylglycerol, membrane phospholipids, fatty acid distribution, fatty acid pairing, 39
Organogenesis, Okra, *Abelmoschus esculentus*, tissue culture, callus, plant regeneration, silver nitrate, 77

Papaver somniferum L., seed development, lipids, triacylglycerols, fatty acids, 55
Phaseolus vulgaris, dry bean, regeneration, cotyledonary node, benzyladenine, 117
Phenotypic variability, potato protoplast-derived plants, somatic hybridization, genetic instability, somaclonal variation, 101
Phosphatase, calcium-regulated protein kinase, histone phosphorylation, host-pathogen interaction, *Glycine max*, *Phytophthora megasperma*, 67
Phosphatidylglycerol, organelle isolation, membrane phospholipids, fatty acid distribution, fatty acid pairing, 39
Phosphoglycolate phosphatase, immunochemical reactivity, photorespiration, C_3, C_3-C_4, C_4 and CAM plants, dicots, monocots, 9
Photorespiration, C_3-C_4, intermediate, *Neurachne*, photosynthesis, $^{14}CO_2$, 155
—, immunochemical reactivity, phosphoglycolate phosphatase, C_3, C_3-C_4, C_4 and CAM plants, dicots, monocots, 9
Photosynthesis, C_3-C_4, intermediate, *Neurachne*, photorespiration, $^{14}CO_2$, 155
Photosynthetic electron transport, photosystem II, cyanobacteria, DCMU, quinone-binding protein, 149
Photosystem II, ammonia metabolism, herbicides, nitrogen assimilation, 61
—, cyanobacteria, DCMU, quinone-binding protein, photosynthetic electron transport, 149
Physical mapping, *Lycopersicon esculentum*, suspension culture, rDNA cloning, rDNA heterogeneity, 199
Phytophthora megasperma, calcium-regulated protein kinase, histone phosphorylation, phosphatase, host-pathogen interaction, *Glycine max*, 67
Pisum sativum, cell wall protein, immunoelectron microscopy, shoot development, intercellular connections, 137
Pisum sativum L., *Rhizobium leguminosarum*, chemical mutagenesis, mutants, nodulation, symbiotic nitrogen fixation, 207
—, *Vicia faba* L., endomycorrhiza, *Rhizobium leguminosarum*, chemical mutagenesis, asymbiotic plant mutants, 215
Plant regeneration, mycoplasma-like organism, *Catharanthus roseus*, tissue culture, 83
—, Okra, *Abelmoschus esculentus*, tissue culture, callus, organogenesis, silver nitrate, 77
—, protoplast, callus formation, *Duboisia myoporoides*, cell suspension, 245
Plant transformation, *Agrobacterium tumefaciens*, callus cultures, kanamycin resistance, firefly luciferase, 223
Plasma membrane, ATPase, detergent solubilization, reconstitution, 189
Pmg elicitor, caffeoyl-CoA 3-*O*-methyltransferase, feruloyl-CoA, *Daucus carota* L., 21
Pollen, *Gerbera*, sperm, 273
Poly(A) polymerase, enzyme purification, subunit structure, kinetic properties, product characterization, hypocotyl tissue, mung bean, 27
Polypeptide (19 kDa), *Brassica napus*, rapeseed, oil-body, seed development, immunogold localisation, 47
Polyploidy, alfalfa, chromosome variation, somatic embryogenesis, aneuploidy, 91
Portulaca oleraceae, weed pathogens, mycoherbicides, toxin regulation, *Drechslera indica*, *Amaranthus spinosus*, 123
Potato, *Solanum*, protoplast, single cell culture, 251
Potato protoplast-derived plants, somatic hybridization, phenotypic variability, genetic instability, somaclonal variation, 101
Product characterization, poly(A) polymerase, enzyme purification, subunit structure, kinetic properties, hypocotyl tissue, mung bean, 27
Protoplast, callus formation, plant regeneration, *Duboisia myoporoides*, cell suspension, 245
—, *Solanum*, potato, single cell culture, 251
Protoplast culture, ultrafiltration, cell division, *Medicago sativa*, *Nicotiana tabacum*, protoplast physiology, 237
Protoplast physiology, protoplast culture, ultrafiltration, cell division, *Medicago sativa*, *Nicotiana tabacum*, 237

Quinone-binding protein, photosystem II, cyanobacteria, DCMU, photosynthetic electron transport, 149

Rapeseed, *Brassica napus*, oil-body, polypeptide (19 kDa), seed development, immunogold localisation, 47
rDNA cloning, *Lycopersicon esculentum*, suspension culture, physical mapping, rDNA heterogeneity, 199
rDNA heterogeneity, *Lycopersicon esculentum*, suspension culture, rDNA cloning, physical mapping, 199
Reconstitution, ATPase, detergent solubilization, plasma membrane, 189
Regeneration, Chinese yam, *Dioscorea opposita*, suspension culture, embryogenesis, 263
—, *Phaseolus vulgaris*, dry bean, cotyledonary node, benzyladenine, 117
Respiration, calcium, cyanobacteria, nitrate, nitrogen fixation, *Synechococcus*, 195
Rhizobium leguminosarum, *Pisum sativum* L., chemical mutagenesis, mutants, nodulation, symbiotic nitrogen fixation, 207
—, —, *Vicia faba* L., endomycorrhiza, chemical mutagenesis, asymbiotic plant mutants, 215

Seed development, *Brassica napus*, rapeseed, oil-body, polypeptide (19 kDa), immunogold localisation, 47
—, *Papaver somniferum* L., lipids, triacylglycerols, fatty acids, 55
Seed germination, *Lupinus luteus*, axial control, cotyledon expansion, chlorophyll, cytokinin, 181
Serpentine synthesis, *Catharanthus roseus*, cytochrome *P*-450 inducer/inhibitor, 231
Shoot bud explants, encapsulation, *Valeriana wallichii*, 111
Shoot development, cell wall protein, immunoelectron microscopy, intercellular connections, *Pisum sativum*, 137
Silver nitrate, Okra, *Abelmoschus esculentus*, tissue culture, callus, organogenesis, plant regeneration, 77
Sinapic acid, anthocyanin, carrot suspension cultures, cyanidin, 259
Single cell culture, *Solanum*, potato, protoplast, 251
Solanum, potato, protoplast, single cell culture, 251
Somaclonal variation, potato protoplast-derived plants, somatic hybridization, phenotypic variability, genetic instability, 101
Somatic embryogenesis, alfalfa, chromosome variation, aneuploidy, polyploidy, 91
Somatic hybridization, potato protoplast-derived plants, phenotypic variability, genetic instability, somaclonal variation, 101
Soybean cells, GDH, structure, antibodies, synthesis, 173
Sperm, *Gerbera*, pollen, 273
Structure, soybean cells, GDH, antibodies, synthesis, 173
Subunit structure, poly(A) polymerase, enzyme purification, kinetic properties, product characterization, hypocotyl tissue, mung bean, 27
Suspension culture, Chinese yam, *Dioscorea opposita*, embryogenesis, regeneration, 263
—, *Lycopersicon esculentum*, rDNA cloning, physical mapping, rDNA heterogeneity, 199
Symbiotic nitrogen fixation, *Pisum sativum* L., *Rhizobium leguminosarum*, chemical mutagenesis, mutants, nodulation, 207
Synechococcus, calcium, cyanobacteria, nitrate, nitrogen fixation, respiration, 195
Synthesis, soybean cells, GDH, structure, antibodies, 173

Taxol, microtobule inhibitors, colchicine, chloroplast movement, 1
Tissue culture, mycoplasma-like organism, *Catharanthus roseus*, plant regeneration, 83
—, Okra, *Abelmoschus esculentus*, callus, organogenesis, plant regeneration, silver nitrate, 77
Toxin regulation, weed pathogens, mycoherbicides, *Drechslera indica*, *Portulaca oleraceae*, *Amaranthus spinosus*, 123
Triacylglycerols, *Papaver somniferum* L., seed development, lipids, fatty acids, 55

Ultrafiltration, protoplast culture, cell division, *Medicago sativa*, *Nicotiana tabacum*, protoplast physiology, 237

Valeriana wallichii, encapsulation, shoot bud explants, 111
Vicia faba L., *Pisum sativum* L., endomycorrhiza, *Rhizobium leguminosarum*, chemical mutagenesis, asymbiotic plant mutants, 215

Water stress, cryopreservation, embryo, freeze-hardening, *Zea mays*, 129
Weed pathogens, mycoherbicides, toxin regulation, *Drechslera indica*, *Portulaca oleraceae*, *Amaranthus spinosus*, 123
Wheat, *N*-acetyl-β-D-hexosaminidase, chitin oligosaccharides, lignification, 163

Zea mays, cryopreservation, embryo, freeze-hardening, water stress, 129
